

Class: Data Structures Section 001

Assignment: Homework 4

Group members: Zach Hammit, Dustin Seger

Instructions: Compile with default g++ settings for Windows. Lab9.cpp contains the main, while the class files are Tree and Word. Mobydick and Peterpan have been included as has the card catalog.

Contributions (They are equitable):

Zach

- Added new functionality to main
- Made word Class
- Made get ascending and descending
- Made remove
- Made Empty Tree

Dustin

- Made rest of Tree.cpp
 - This includes testing and troubleshooting the rotate functions that went with the insert function
